

PRECAUTIONARY WATER SERVICE INTERRUPTION - WRITTEN ADVISORY

TOWN OF SACKVILLE

Date: June 5th, 2017

In order to continue to provide safe and reliable water to the Town of Sackville, a major construction project is underway to upgrade the existing water distribution system on Lorne Street and St. James Street.

During the installation of the upgraded works on Lorne Street and St. James Street, it will be required to interrupt the water service temporarily. Weather permitting, it is anticipated that the interruption in service will be from 10:00 pm Monday June 5, 2017 to 6:00 am on Tuesday, June 6th, 2017 to allow construction crews the opportunity to complete the work. The water service interruption will affect the residents and businesses located in the following areas:

- Bridge Street from Lorne to end of Bridge Street
- St. James Street
- Bennett Street
- Charles Street
- Beal Heights
- Crescent Street
- Fleet Street
- Sloan Drive
- Industrial Drive
- Copp Avenue
- Starr Avenue
- Brooks Avenue
- Devon Avenue
- Tantramar Place
- Ruth Street
- Churchill Ave
- Cattail Ridge
- Robinson Ave
- Stephens Drive
- Squire Street
- Weldon Street
- Harris Drive
- Morgan Lane
- Milner Lane
- Clearance Street
- Princess Street
- Campbell`s Hill

As a result of this work, a precautionary Boil Water Advisory will be issued on the Town of Sackville Water System for these affected areas, effective from Monday, June 5th, 2017 at 1:00 pm.

During the course of the interruption, you will most likely not have access to water and/or experience a drop in the available water pressure and flows and discoloration of the water. It is recommended that water be drawn before the interruption for use throughout the day.

To minimize the potential inconvenience of this disruption to your service, we recommend the following during the water shut down in your area:

1. Close the water valve where the water line enters your basement and close the circuit breaker for your hot water heater.
2. When the water service is restored, run your cold water FIRST for a few minutes or until clear water shows and then open the circuit breaker for your hot water heater. ONLY AFTER, run your hot water until clear water shows.

We appreciate your cooperation in this matter and apologize for any inconvenience this may cause. If you have any questions concerning this subject, please feel free to contact us at the numbers below.

Sincerely,

Town of Sackville
