Community Health Needs Assessments

2014-2019

WHO WE ARE

OUR NETWORK AND EXTERNAL PARTNERS

Horizon Health Network operates 12 hospitals and more than 100 medical facilities, clinics and offices throughout New Brunswick. Our services range from acute and specialized care to community-based health services. Horizon also administers 8 provincial programs. In all cases, offering services in both English and French.

At the heart of Horizon's ongoing commitment to excellence in health-care delivery are our guiding principles of quality and safety, which are the pillars of our health system.

In addition to the health care services we provide, Horizon partners with an exceptional group of external health-care providers who help to deliver important health-care services to residents of New Brunswick.

COMMUNITY HEALTH CENTRES

Some of these facilities were once rural hospitals that have been converted into Community Health Centres. They provide a range of services delivered by physicians, nurses and support staff, including x-ray, bloodwork and community programs. Examples include: Albert County and Minto.

HEALTH CENTRES & CLINICS

These facilities include physician and nurse-provided services only. The long-term goal is to turn all these facilities into Community Health Centres that provide a broader range of services.

COMMUNITY HOSPITALS

Services at these facilities are provided by nursing staff and family physicians. Specialists and specialized services are provided by their regional hospitals through visiting clinics and consultations. Examples include: Sussex, Sackville, Grand Manan, Oromocto, St. Stephen and Perth-Andover.

ACUTE CARE HOSPITALS

The five regional hospitals: The Moncton Hospital, Saint John Regional Hospital, Dr. Everett Chalmers Regional Hospital, Miramichi Regional Hospital and Upper River Valley Hospital.

TANTRAMAR AREA
COMMUNITY HEALTH NEEDS ASSESSMENT

COMMUNITY HEALTH NEEDS ASSESSMENTS

A CHNA is a dynamic, ongoing process that seeks to identify and define community's strengths, assets and needs to guide in the establishment of priorities that improve the health and wellness of the population

There are lots of programs and services available but we don't always know what is available from who. Can we help **coordinate health promotion programming** in a more efficient way?

health care isn't always personalized. A **community health centre model of care** would help make health care and "friendly" again

For many people, it can be hard to get around - **transportation** is something we want to work on

Food is a basic need! We want all people to have **access to affordable, fresh foods!**

Youth don't know where to go to get help. We want to help them with coping skills so that they can be **resilient!**

WHAT ELSE?
